This is a list of all corrections made to The TeXbook since the second printing. If your copy doesn’t say ‘Second printing (October 1984)’ on the copyright page, you should also look at the previous bug list. In fact, the most important corrections to the first printing were discovered first, so they’ve already been made.

Page 23, line 16 (10/13/84)
This is TeX, Version 1.0 (preloaded format=plain 83.7.15)

Page 33, line 32 (10/21/84)
The bottom line shows how far TeX has gotten until now in the story

Page 41, lines 7 and 8 (10/8/85)

The twin operations \uppercase{⟨token list⟩} and \lowercase{⟨token list⟩} go through a given token list and convert all of the character tokens to their

Page 57, line 17 (1/6/86)

\[dd \text{ didot point (1157 dd = 1238 pt)}\]

Page 61, lines 17–19 (12/18/85)

\[\text{depth, em, ex, fil, height, in, l, minus, mm, mu, pc, plus, pt, scaled, sp, spread, to, true, width.} \text{ (See Appendix I for references to the contexts in which each of these is recognized as a keyword.)}\]

Page 67, append a new exercise (1/19/85)

\[\text{\textbf{EXERCISE 11.6}}\]

Construct a \frac macro such that ‘\frac1/2’ yields ‘\frac1/2’.

Page 130, line 15 (4/17/85)

\[
\$y'''_3+g''^2$
\]

Page 170, line 5 (5/28/85)
tall, unslanted letter; and so on. But two of the examples involve corrections that were

Page 194, lines 13–15 should be centered better (10/22/84)

\[x \equiv x; \hspace{1cm} (1)\]
\[\text{if } x \equiv y \text{ then } y \equiv x; \hspace{1cm} (2)\]
\[\text{if } x \equiv y \text{ and } y \equiv z \text{ then } x \equiv z. \hspace{1cm} (3)\]
general format is the same as for \def and \gdef, but \TeX blindly expands the tokens of the replacement text according to the expansion rules above. For example, consider

\begin{verbatim}
Weight  Servings  Approximate Cooking Time*
8 lbs.  6        1 hour and 50 to 55 minutes
9 lbs.  7 to 8   About 2 hours
9 1/2 lbs. 8 to 9 2 hours and 10 to 15 minutes
10 1/2 lbs. 9 to 10 2 hours and 15 to 20 minutes
\end{verbatim}

Page 236, lines 18–21 (1/19/85)

\begin{verbatim}
Squab    Poussin  2  3/4 to 1  Broil, Grill, Roast
Broiler  Poulet Nouveau 2 to 3  1 1/2 to 2 1/2  Broil, Grill, Roast
Fryer    Poulet Reine  3 to 5  2 to 3  Fry, Sauté, Roast
Roaster  Poularde  5 1/2 to 9  Over 3  Roast, Poach, Fricassee
\end{verbatim}

[This change should also be made at the bottom of page 237.]
what part of \TeX's memory has become overloaded; one of the following fourteen things will be mentioned:

- **number of strings** (names of control sequences and files)
- **pool size** (the characters in such names)
- **main memory size** (boxes, glue, breakpoints, token lists, characters, etc.)

If you have a job that doesn't overflow \TeX's capacity, yet want to see just how closely you have approached the limits, just set `\tracingstats` to a positive value before the end of your job. The log file will then conclude with a report on your actual usage of the first eleven things named above (i.e., the number of strings, ..., the save size), in that order. Furthermore, if you set `\tracingstats` equal to 2 or more, \TeX will show its current memory usage whenever it does a `\shipout` command. Such statistics are broken into two parts; `490 & 5950` means, for example, that 490 words are being used for “large” things like boxes, glue, and breakpoints, while 5950 words are being used for “small” things like tokens and characters.

\begin{verbatim}
\texttt{\textbackslash tenrm } | (ligature \textendash)
\end{verbatim}

sentable as `\texttt{\^\textasciimacron}`. Asking \TeX to `\texttt{\show\^\textasciimacron}` produces the response `	exttt{>` \texttt{\^\textasciimacron}=macro:\texttt{->\textasciigrave}.

\begin{verbatim}
no "explicit kerns," and an italic correction is an explicit kern.) But the italic correction may be too much (especially in an italic font); `\texttt{s\lowercase{helf}}\texttt{(kernOpt\texttt{\textbackslash ful}} is often best.
\end{verbatim}

\begin{verbatim}
\texttt{\textbackslash def\appendroman#1#2#3\texttt{(\edef#1{\texttt{\def\noexpand#1{\csname}
\end{verbatim}

11.6. \begin{verbatim}
\texttt{\def\frac#1/#2{\leavevmode\kern.1em}
/\kern-.15em\lower.25ex\hbox{\the\scriptfont0 #2}}}
\end{verbatim}

[This causes answer 12.8 to move to page 312; answer 12.16 also moves to page 313.]

\begin{verbatim}
\texttt{\def\sqr#1#2{{\vcenter{\vbox{\hrule height.2pt
/\kern-.15em\lower.25ex\hbox{\the\scriptfont0 #2}}}}}
\end{verbatim}

[8/10/85]
19.16. \( \hfill x \equiv x; \hfill \llap{(1)} \cr \hfill \hbox{if} \quad x \equiv y \quad \hbox{then} \quad \llap{(2)} \cr \hfill \hbox{if} \quad x \equiv y \quad \hbox{and} \quad \llap{(3)} \cr y \equiv z \quad \hbox{then} \quad \llap{(1)} \cr \hfill \llap{x \equiv z}. \hfill \llap{(3)} \cr} \hfill \llap{(1)} \cr

There's also a trickier solution, which begins with:

\( \hfill \hfill x \equiv x; \hfill \llap{(1)} \hfill \neg \cr

Page 330, line 29 (11/15/85)

\( \edef \next #1 #2 { \def #1 { \b #2 \d} } \next \a \c \)

Page 332, lines 17–24 (1/19/85)

\settabs \+ indent&\frac{1}{2} lbs. \quad Servings&\frac{1}{2} lbs.\quad Servings&\cr
\+ & Approximate Cooking Time&\+ &\cr
\smallskip
\+ & 8 lbs.&6 &1 hour and 50 to 55 minutes\cr
\+ & 9 lbs.&7 to 8 &About 2 hours\cr
\+ & 9\frac{1}{2} lbs.&8 to 9 &2 hours and 10 to 15 minutes\cr
\+ & 10\frac{1}{2} lbs.&9 to 10&2 hours and 15 to 20 minutes\cr

proofs. (You weren't supposed to think of this, but it has to be mentioned.) See exercise 11.6 for the \( \frac{}{} \) macro; it's better to say \( \frac{1}{2} \) than \( \frac{1}{2} \), in a cookbook.

Another way to treat this table would be to display it in a vbox, instead of including a first column whose sole purpose is to specify indentation.

Page 337, line 28 (11/12/85)

\nextnumber

Quick should put \( \relax \) at the end of his macro. (The keywords 1,

Providence RI 02940-9506, USA.

Page 483, lines 22–23 (1/19/85)
P.O. Box 9506
Providence RI 02940-9506, USA.

Note: The next printing will use the “real” Computer Modern fonts instead of
the “almost” Computer Modern fonts. Therefore many of the line breaks will
be slightly different. Also, the font-related numerical data on pages 27, 29, 66,
75, 76, 79, 88, 98, 99, 112, 113, 310, 314, 396, 399, 409, 420, and 459 will be
different. However, these differences need not be listed here, because the old
book was correct with respect to the old fonts.
